Options

Air Lumbar:
☒ The Air Lumbar® option has been

chosen. If you do not want this option please uncheck the selection. Proper lower back support is crucial to a healthy seated posture. With the backrest height set to fit the curvature of your lower back (lumbar region) the Air Lumbar® can be inflated to adjust the firmness of the backrest by pumping air into the lumbar area.

S'port Foam

☐ The S'port Foam option has not been chosen. If you want this option please check the selection. S'port Foam is BodyBilt's memory foam for added softness. Adds 1" of foam to the seat. May be ordered in either or both seat and back.

S'port Ridge

☐ The S'port Ridge option has not been chosen. If you want this option please check the selection. The S'port Ridge is another BodyBilt exclusive. The vertical foam ridge gives amazing added support to the middle (thoracic region) and upper back.

ROHO Cushion

☐ The ROHO cushion option has not been chosen. If you want this option please check the selection' The ROHO option is a network of individual, interconnected air cells that allow air to slowly transfer from chamber to chamber as it more evenly distributes body weight and enhances blood flow.

Back Depth Adjuster

 Get A Personalized Chair
 Within 10 Days. [Details](#)

Alternatives...

[Smoothie](#) [Link 2](#)

Because of your frame/height combination you have been selected for the Back Depth Adjuster

The depth of the seat pan against the seat can be adjusted with this optional feature. The back may be moved in a 2" range inward or out and away from the seat.
